TRADITIONAL LADDER or drop in step

DROP IN POLYMER STEPS Utilize our Step Adapter Kit Steps purchased separately

POUR IN PLACE STEP WITH CUSTOM LINER Metal mold filled with crushed stone and sand capped in concrete. Just like a traditional in ground pool!

FAST FACTS BEFORE YOU BUY

ROUND CONCRETE COLLAR

KEY FEATURES AND TIPS

The Optimum round pool requires a concrete collar only when it is installed 24" or more in the ground. The collar is 8" deep x 12" wide, and it is installed all the way around the pool. Rebar is supplied with the pool to bond the pool to the concrete. No collar is needed if the pool is above ground or less than 24" below grade.

OVAL CONCRETE FOOTING AND COLLAR

When the Optimum oval is installed 24" or more below grade it requires a concrete collar. The concrete collar is 8" deep x 12" wide and goes completely around the pool. The oval pool still requires a concrete footing when it has the concrete collar. Both the footing and the collar are needed when the pool is 24" or more below grade.

bug out panels

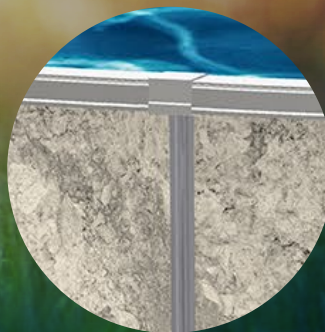

Our Foam core has an insect resistant barrier! The Optimum pool walls have a built in Insecticide, so no pests will stop the summer fun!

3. LIGHT THE NIGHT

LIGHT YOUR OPTIMUM POOL! DURABLE yet thin Aluminum and Foam core walls make it SIMPLE to install LED Lighting. LED Lights work with the Optimum Pool special return fitting.

STRENGTH AND VERSATILITY The Optimum wall is manufactured from high quality corrosion resistant aluminum 5052-As thick as it is durable. This pool outlasts all in its class.

WITH A 5 YEAR WARRANTY AND A 50% AT COST LIFETIME WARRANTY.

OPTIMUM POOL'S INSULATED PANELS HAVE A HEAT RETENTION VALUE OF R10.

These insulated panels keep the pool warmer by reducing heat loss. Add a solar cover to hold heat and even make the pool warmer. The combination of our walls and solar cover lets you start enjoying your pool earlier in the season and prolongs use later in the season. Above all else this means less use of a heater or NO need for a heater at all!

OPTIMUM POOL IS IDEAL FOR WATERFRONT PROPERTY

Where the water table is high which prohibits traditional in ground pools.
